

You have already created the homepage for the Example Caf é site that we will be building throughout the course. You also created a recipes page. Now you need to create three more pages so that we can continue to build the site in coming sessions. Each page should start like the homepage, with a level 1 heading saying " Example Caf é , "

followed by the paragraph:

" Welcome to Example Caf é. We will be developing this site throughout the course. "

After this:

- a. For a menu page, add a level 2 heading saying " Menu. " This should be followed by a paragraph saying, " The menu will go here. " Update the content of the < title > element to reflect that this page will feature the menus at the café. Save the file with the name menu.html
- b. For an opening times page, add a level 2 heading saying " Opening hours. " This should be followed by a paragraph saying " Details of opening hours and how to find us will go here. " Update the < title > element to reflect that the page tells visitors opening hours and where to find the caf é . Save the file with the name opening.html .
- c. For the contact page, add a level 2 heading saying " Contact. " This page should contain the address: 12 Sea View, Newquay, Cornwall, UK. Update the < title > element to reflect that the page tells visitors how to contact the cafe.
